eFront Pevara solution

The eFront Pevara solution will allow Wellershoff & Partners (WP) to access reliable and timely performance benchmarking information through a user-friendly platform, in order to generate leading-edge research with up-to-date information every quarter. One of the key reasons WP selected eFront Pevara was because it has one of the most comprehensive databases on the market, covering a large variety of regions, countries and investment strategies that are often neglected by other sources.

“ eFront Pevara is more than a simple source of data, it is a trusted partner with which we can develop our expertise, as it supports our business by providing crucial and reliable information. It enables us to serve our clients in the best way possible.”
