eFront Invest solution

SMAM searched for the best-in-class compliance system that would consolidate all its data and be able to support its future growth. The asset manager chose eFront Invest in order to streamline its alternative investments across all asset classes and complex investment structures while using just one system. In addition to increasing the efficiency of its operations through comprehensive workflows and auditing tools, eFront Invest provides robust reporting functionalities to ensure a smooth exchange of data with Sumitomo's stakeholders.

“ It is not easy to manage alternative investment products using systems designed for traditional assets. We needed a more optimal management tool, in order to improve the quality and efficiency of our operational monitoring and reporting capabilities. eFront Invest provides exactly that. By adopting this solution, we have greatly enhanced our data processing capabilities, allowing us to scale our alternative investments handling over time.”

**Haruhiko Takamoto, SMAM
Head of Alternative Investment
Group**

Key benefits
